

Complete Algebra Summary ? 1st Secondary

DEMO FILE ? replace with the real document from the dashboard.

Laws of exponents:

$$a^m \times a^n = a^{(m+n)} \quad (a^m)^n = a^{(m \times n)} \quad a^0 = 1$$

Solving linear equations:

Isolate the variable using inverse operations on both sides.

Slope of a line through (x_1, y_1) , (x_2, y_2) :

$$m = (y_2 - y_1) / (x_2 - x_1)$$

Trigonometric ratios (right triangle):

$$\sin A = \text{opposite} / \text{hypotenuse}$$

$$\cos A = \text{adjacent} / \text{hypotenuse}$$

$$\tan A = \text{opposite} / \text{adjacent}$$

Practice questions with answers are provided in class.
